## Ementa

Essa disciplina visa abordar as novas tendências de pesquisa e novos métodos e técnicas de análise em História Antiga e Medieval. A partir dos novos estudos acerca da conectividade e mobilidade para a construção do mundo antigo e do mundo medieval, discutiremos temas centrais como - globalização, agenciamento, redes, portos, mobilidade populacional e de objetos, circulação de informação e recepção. A partir de diálogos interdisciplinares, debateremos os projetos dos alunos e atentaremos, sobretudo, para a contribuição de métodos computacionais
